RE: Minerals Permit ML 48800-MP
DOGM Permit #S/047/075

Dear Mr. Jenson,

On October 2, 2002, the Director approved a one-year renewal of your Mineral Materials Permit ML 48800-MP until September 30, 2003.

Also, the Trust Lands Administration has reviewed a cultural resources survey completed by Sagebrush Consultants covering the permitted lands proposed for stone gathering operations. The survey appears in order and indicates no adverse impacts.

You may proceed with proposed stone operations upon the permitted lands provided that you have met all permitting requirements of the Division of Oil, Gas & Mining relevant to your activity.

Please maintain accurate records of all stone gathered from the lands and make timely royalty reports and payments to the Trust lands Administration.

Please contact me if you have any questions in this matter.

Sincerely,

John T. Blake
Mineral Resources Specialist
